

PRODUCT DATASHEET

FLANGE GUARD SUREBAND CLEAR

Ideal for Acid / Caustic / El15 Oil
and Diesel mist prevention.

SERVICE & PROPERTIES:

Manufactured from All-PTFE materials (no fibreglass) comprising clear ETFE outer and multilayered ECTFE mesh inner. This material provides unparalleled chemical resistance. All our shields are tested on our hydrostatic pressure test facility, test certificates available on request.

The internal mesh is compressed against the flange and prevents direct and lateral spray. The liquid pressure inside is rapidly diffused, resulting in a safe drip-release.

SureBand Clear is very quick to install using heavy duty Velcro tabs which have been leak tested at various orifice sizes at pressure up to 75 Bar. It can be re-used in the event of a leak, thus providing a long term solution.

This product can also be made to fit valves and other non-standard pipe joints, contact Flexitallic Australia for further information.

AVAILABILITY:

Pipe Sizes: 15mm to 1200mm

TYPICAL APPLICATIONS:

Acid, Bases, Oil

TYPICAL PHYSICAL PROPERTIES:

Band Material	ETFE
Mesh Material	ECTFE
Fastener	Heavy Duty Velcro
Shear Force	196 N
Max. Temperature	230°C
Flange Ratings	ANSI / DIN/ many others
Leak Detection	Visual Litmus Paper

As the company's products are used for multiplicity of purposes, and as the company has no control over the method of their applications or use, the company excludes all conditions or warranties, expressed or implied by statute or otherwise, as to their products and/or their fitness for any particular purpose. Any technical co-operation between the company and the customer is given for customers assistance only and without liability on the part of the company. The Company does not give any warranty that the product will be suitable for the use intended by the customer.
